Class's Assembly

Class' Assembly

It is a project developed by some schools at a nacional level, with the goal of promoting the students' participation in their own education in their classes.

The students give the feedback about the last semester and debate with their teacher about proposals to turn the class a better place and also to make a better environment, so that the students can develop in a better way their capacities.

In this assemblies we also debate and plan the final project of each class.

We make a report of the assembly and then it is sent to the school direction, so that they study the development of the students education.
