

# SHAPE, CREATE, EDUCATE

training course

# about the project

In a rapidly digitalizing world, traditional handicraft techniques offer a unique and tangible way to foster creativity, enhance learning experiences, and build strong connections between individuals. Shape, Create, Educate is a training course designed for youth workers, educators, and community leaders who wish to explore the potential of handicrafts as a tool for non-formal education and networking.

During this interactive and hands-on training, participants will:

- Discover how various handicraft techniques can be used to support learning, personal development, and social inclusion.
- Learn how creative manual activities can enhance engagement, well-being, and soft skills in youth work.
- Exchange best practices and develop new collaborations with like-minded professionals across Europe.
- Explore how handicraft can serve as a medium for storytelling, cultural exchange, and community building.

Through practical workshops, discussions, and networking sessions, participants will not only gain new skills but also create meaningful partnerships that can lead to future projects and initiatives.

# about us

The goal of the organization is to promote artists who, through their talents, dedication to developing their skills and craft, serve as an example to others.

They inspire, teach, and demonstrate how to navigate the path of learning, self-education, and brand building, leading to undeniable success in their fields of creativity. The organization brings together individuals involved in handicrafts from the Mazovia region. It supports local artists by organizing technical workshops, promoting their work, and providing individualized support based on their needs.
